

Running the Wetta Admin Console

A plain-language guide to managing inventory, pricing, stock, and access for the sales team — from one dashboard.

1

GETTING STARTED

What the console is for

The Admin Console is where the product catalogue, pricing, and stock levels that sales staff see are kept up to date, and where the sales team's access is controlled. Everything entered here reflects immediately on the sales catalogue.

You'll find it at:

admin.wettabathfittings.com

i

Separate from the sales app

The admin console is a completely separate address from the sales catalogue — sharing it with sales staff isn't necessary and isn't recommended.

Add the console to your home screen

Like the sales catalogue, the admin console can be installed as its own app icon, separate from the sales app, so you can jump straight into managing inventory without opening a browser first.

A ANDROID (CHROME)

1. Open **admin.wettabathfittings.com** in Chrome.
2. Tap the **:** menu in the top-right corner.
3. Tap **Install app** (or **Add to Home screen**).
4. Confirm by tapping **Install**.

IOS IPHONE (SAFARI)

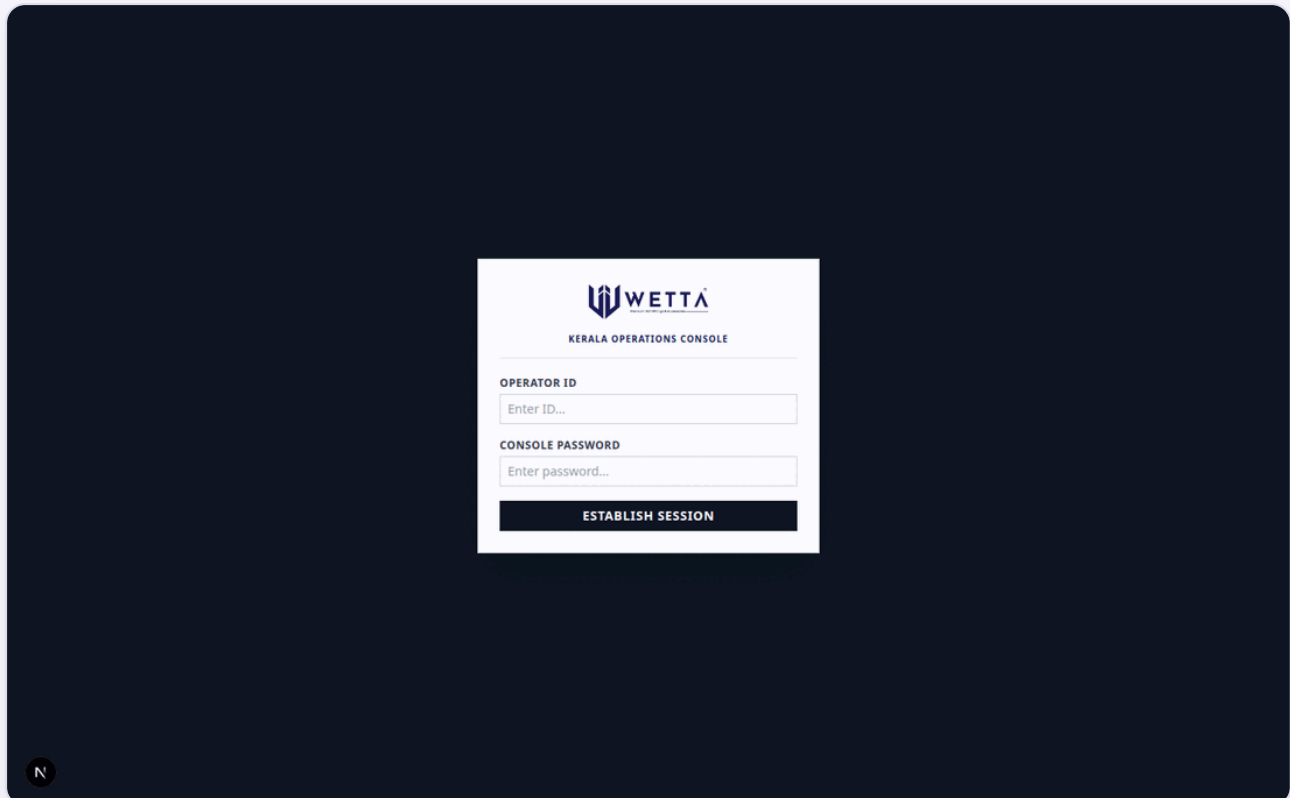

1. Open **admin.wettabathfittings.com** in Safari.
2. Tap the **Share** icon at the bottom.
3. Scroll down and tap **Add to Home Screen**.
4. Tap **Add** in the top-right corner.

3

SIGNING IN

Logging in securely

Enter your Operator ID and Console Password to sign in. Sessions are kept on the server, so you'll stay signed in on that device until you explicitly log out.

The admin login screen.

Change the default password

If this console was just set up, sign in with the factory-default Operator ID and password first, then go to **Config Settings** → **Administrative Security** and set your own straight away.

The four sections

Everything lives behind four tabs in the left-hand menu:

1

Inventory Master

Search, edit, and delete existing products.

2

Product Entry

Add a brand-new product one at a time.

3

Bulk Tally Sync

Update stock & prices for many items at once from a Tally export.

4

Config Settings

WhatsApp number, stock rules, catalogue password, and your login.

Viewing and editing products

This is the full product list, with running totals of how many items are In Stock, Low Stock, and Out of Stock. Use the search box or the category buttons to narrow the list down.

The Inventory Master table — every product, with live stock totals at the top.

Editing a product

Click **Edit** on any row to change its name, category, price, stock count, or photo right there in the table, then click the checkmark to save.

Editing a row in place — update any field, then save or cancel.

Deleting is permanent

The trash icon on each row removes a product immediately — there's no undo, so double-check before confirming.

Creating a new product record

Use **Product Entry** to add one new item: item code, category, name, MRP, wholesale rate, and starting stock count are all required. A photo is optional but recommended.

The screenshot displays the 'MANUAL PRODUCT ENTRY PANEL' interface. On the left is a dark sidebar with the WETTA logo and navigation links: INVENTORY MASTER, PRODUCT ENTRY (highlighted), BULK TALLY SYNC, CONFIG SETTINGS, LOG-OUT, and BACK TO SALES PORTAL. The main panel shows a 'WELCOME BACK, ADMIN USER!' message and a 'NEW PRODUCT RECORD' form. The form includes fields for ITEM CODE (E.G., HF111), CATEGORY (Health Faucets), PRODUCT DESCRIPTION / NAME (E.G., Wireless Bluetooth Speaker 20W), MRP (₹) (0.00), WHOLESALE RATE (₹) (0.00), and INITIAL STOCK COUNT (*). There is also a 'PRODUCT IMAGE (OPTIONAL)' section with a 'CHOOSE FILE' button and a note that images are compressed client-side and uploaded to R2 storage. At the bottom right of the form are 'Clear Form' and 'Add Product Record' buttons.

The new product form — fill in the required fields and click Add Product Record.

Adding a photo

Click **Choose File** and pick an image — it's automatically resized and uploaded, with a preview shown right in the form.

Add Product Record

A successful upload — the photo preview and file name appear once it's done.

Updating many items at once

If stock is tracked in Tally ERP, export it as Excel or CSV and drag it into this screen. The system reads the **Particulars** (item code & name), **Closing Balance Quantity**, and **Rate** columns, matches them against existing item codes, and shows you a preview before anything is saved.

Drop your Tally export here — you'll get a preview to confirm before it updates the catalogue.

Review before confirming

The preview screen flags unrecognised item codes and unchanged rows separately, so you can catch mistakes in the export before they reach the sales catalogue.

The three settings panels

WhatsApp Contact Configuration sets the number quotations are sent to when a salesperson taps "Send to Admin." **Low Stock Threshold** decides the cutoff below which the sales catalogue shows "Low Stock" instead of "In Stock" (zero always shows "Out of Stock"). **Sales Catalogue Privacy** sets or removes the password sales staff need to open the catalogue. **Administrative Security** is where you change your own Operator ID and password.

The screenshot displays the 'CONFIG SETTINGS' page for 'WETTA KERALA OPERATIONS'. The left sidebar shows the user as 'ACTIVE OPERATOR Admin User' and lists navigation options: INVENTORY MASTER, PRODUCT ENTRY, BULK TALLY SYNC, CONFIG SETTINGS (selected), and LOG-OUT. A 'BACK TO SALES PORTAL' button is at the bottom of the sidebar.

The main content area, titled 'QUOTATION CONTACT CONFIGURATION', contains three settings panels:

- WHATSAPP CONTACT CONFIGURATION:** Includes a 'WHATSAPP CONTACT NUMBER' field (919999999999) and a 'LOW STOCK THRESHOLD' field (50). A 'Save Settings' button is at the bottom right.
- SALES CATALOGUE PRIVACY:** Features a 'PROTECTED' status indicator. It includes fields for 'NEW CATALOGUE PASSWORD' and 'CONFIRM PASSWORD', both with a 'Min 4 characters...' hint. 'Disable Protection' and 'Update Password' buttons are at the bottom.
- ADMINISTRATIVE SECURITY SETTINGS:** Includes fields for 'NEW OPERATOR ID / USERNAME' (admin), 'CURRENT PASSWORD (VERIFY)' (Verify identity...), 'NEW CONSOLE PASSWORD' (Min 4 characters...), and 'CONFIRM NEW PASSWORD' (Re-enter password...). An 'Update Credentials' button is at the bottom right.

All four settings panels, top to bottom.

Changing the catalogue password logs everyone out

The moment you set a new catalogue password, every salesperson's app will ask for it again next time they open it — let the team know before you change it.

9

DAY-TO-DAY TIPS

Keeping things running smoothly

- **Update the catalogue password after staff changes.** If someone with access leaves the team, set a new password right away.
- **Revisit the low stock threshold seasonally.** A number that made sense for slow months may need raising during a busy season, so sales staff get an earlier warning.
- **Prefer Bulk Tally Sync for routine restocks** and use Product Entry only for genuinely new items — it's faster and less error-prone for updating quantities across many SKUs.

Common questions

FORGOT THE ADMIN PASSWORD

There's no self-service reset yet — contact whoever manages the technical setup of the site to reset it directly.

A PHOTO WON'T UPLOAD

Check the file is a genuine image (JPG/PNG) under 8MB. Slow connections can also time out — try again on a stronger connection.

BULK SYNC SHOWS "UNRECOGNISED" ROWS

The item code in the Tally export doesn't match anything in the catalogue yet — add it once via Product Entry, then future syncs will match it automatically.

SALES STAFF SAY THE CATALOGUE IS EMPTY

Check your internet connection and try the refresh icon; if it persists, confirm the product list still shows correctly here in Inventory Master.

QUOTATIONS AREN'T REACHING WHATSAPP

Double-check the number in Config Settings → WhatsApp Contact Configuration includes the country code with no spaces or symbols.
